

THE INSTITUTIONAL PROFILE

FY'12 Perkins IV Application

The Institutional Profile (IP) provides numeric information about student enrollment in career and technical education programs and supports the institution's choice of major efforts. It indicates whether or not the effort is of sufficient size and scope to be funded. The IP provides information on the institution's efforts to provide services to students who are members of special populations and numbers and categories of students with a disability. It is also used in providing required information to the U.S. Department of Education (USDE) regarding enrollment in career clusters, the ethnicity of career/technical education students, and enrollees' special population status. **In addition, NEW data is required for civil rights purposes. This new data will enable SED to compare the characteristics of CTE students with those of non-CTE students. This additional data will be reported on the WORD document INSTITUTIONAL PROFILE, ATTACHMENT 1 (attached to this E-Mail).**

Please read the following before completing the EXCEL file

- Where a consortium exists, EACH member of the consortium MUST submit a separate Institutional Profile. Combined Profiles will NOT be accepted.
- ONLY list credit-bearing programs that are assigned HEGIS codes 5000-5599. Do NOT list credit-bearing programs in other HEGIS codes.
- List all eligible credit-bearing programs in numeric order by HEGIS code, followed by all eligible noncredit-bearing programs in CIP code order.
- Report **Fall 2010** enrollments in each credit-bearing and noncredit-bearing career/technical program. ONLY report Fall 2010 enrollments in each program. Do NOT list programs that did not have any students enrolled in Fall 2010.
- Non-credit programs reported must include academic and occupational learning combined toward the attainment of a **specific occupational skill** and be 100 or more hours in length. Non-credit programs reported must include the CIP code assigned to that program.
- The Profile may ONLY be submitted electronically; do NOT include a hard copy with your application; however, it is suggested that a copy be maintained with your files.
- The Profile **MUST** be submitted no later than the application due date, May 16, 2011. Institutions are encouraged to transmit their IP at the earliest possible date but no later than May 16, 2011.
- Applications CANNOT be approved for funding without a complete IP containing the required data.
